

5. Control buzzer

The summary program of this experiment is shown below:

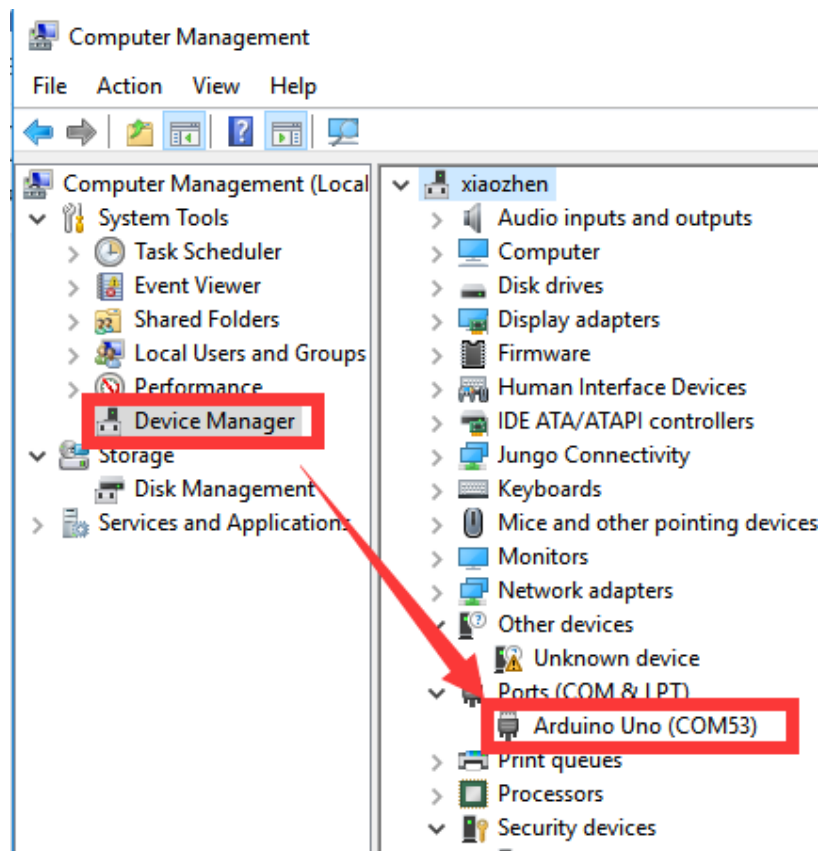

1. Search for blocks

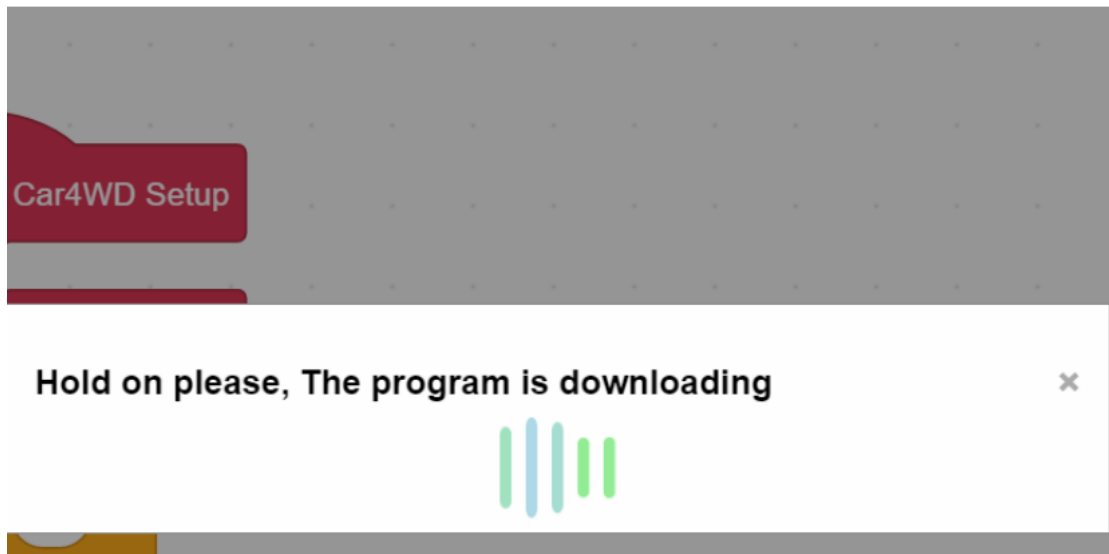

2. Download program

2.1 In the upper right corner of Helloblock, we need to select the port that the serial number displayed by the device manager (for example: COM54) As shown in the figure below.

2.2 Click the up arrow to start compiling and uploading the program. It will take a certain amount of time, we need to wait patiently.

It takes a certain amount of time to compile the program, and everyone needs to wait patiently.

2.3 When the words "Done compiling Done uploading" appear in the lower right corner of the programming interface, as shown in the following figure, the program has been uploaded.

```

3.Experimental phenomena

After the program is downloaded, the buzzer on the Arduino 4WD car will make a sound every second.
